

Why Build AI Agents from Scratch?

Miguel Otero Pedrido

Senior ML / AI Engineer at Dressipi

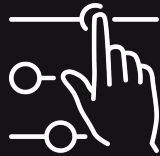

Founder @ The Neural Maze

Why build AI Agents from Scratch

Framework
independence

Customizability and
domain optimization

Real understanding

Framework Independence

- Flexibility and independence from predefined frameworks to meet unique project requirements.
- Mitigating risks associated with framework updates or changes that could disrupt workflows.
- Developing AI agents in languages or environments unsupported by existing tools.

Customizability and Domain Optimization

- Tailoring the system to meet specific needs and requirements.
- Optimizing for particular domains to improve relevance and efficiency.
- Ensuring adaptability to changing needs or contexts.

Real Understanding

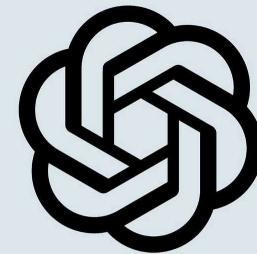

*“What I cannot
create, I do not
understand,”*

---Richard P. Feynman---

Setting Up Development Environment

- Google Colab for all of our implementation
- As an LLM provider, we'll use GPT-4o

ChatGPT-4o

Thanks
